The Appeal Brief filed on 12 March 2004 and the arguments presented therein have been very carefully considered by the Examiner. Accordingly, it is now agreed that the reference to Anderson et al. does not disclose or reasonably suggest the claimed invention for the following reasons.

Examiner's Statement Of Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The prior art of record in this application fails to disclose or reasonably suggest an optical filter system or a process for packaging an optical filter which includes a package with includes an optical filter installed within the package having at least two thin film mirrors to define a resonant cavity and a getter that absorbs moisture to stabilize the optical filter. The closest prior art of record is U.S. Patent Application Publication US2002/0064352 A1 to Andersen et al. Anderson et al. discloses a package or housing that includes exemplary optical components and a getter, which withdraws moisture from a cavity region. Anderson et al. further discloses broadly the exemplary optical component may also "retain any combination of optical components" (Column 2 [0024]), but fails to specifically disclose the optical components in the package to be a filter having two thin film mirrors that define an optical resonant cavity. Therefore, claims 1-11 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
